

Goals for Heart of Edmonds Schools & Community Heartsafe Project

We believe we can make our schools and communities “Heart Safe” through the education of our children and our community. We owe everyone the knowledge of how to save a life (CPR education), and how to use an AED (Automated External Defibrillator). As a valued member of our community, I am sure you can appreciate the impact this can make. In fact, the lives saved, may one day include you!

Founded on successful programs in Auburn, Federal Way, Snohomish, Seattle and Tacoma, the Heart of Edmonds project is designed to achieve three main objectives:

- 1) Educate the community on the safety & use of AED’s and CPR
- 2) Through private funds equip every public school and community field in the Edmonds School District with an AED and a proper emergency plan for Sudden Cardiac Arrest, and
- 3) Implement ongoing instruction and maintenance programs.

Jerry & Melinda Truax

In memory of our son Matthew Truax
September 18, 1996 – September 13, 2013
